Subject: Haskell Lake - Tower Standard (Discussion)

I placed a folder titled (Discussion) Haskell Lake - Tower Standard on our share drive and placed a number of documents in it for the Discussion tomorrow.

The area is a little confusing with a number of BRRTS sites in the general vicinity and the data in the these files and brrts actually makes it more confusing. Because I am not sure what documents will be the best suited to the discussion tomorrow I wanted to at least make the data available – mostly the tables and figures in various reports but I don't want to remove them from the reports so it will be easier to reference the document or other associated information.

Anyway, the link below will take you to the materials I placed in the folder

<<\\rhinelan\RR\CLOSURE PACKAGES\ (Discussion) Haskell Lake - Tower Standard>>

 0364127899_TOWER STANDARD SERVICE
 Info from EPA

In the folder

 0364127899_TOWER STANDARD SERVICE

I did remove the figures from the registry packet to make it easier so you don't have to find them in the packet but included the packet for reference. So just print the two sets of figures or have available.

 Registry Packet
 2,354 KB 0364127899 - Figures from File.pdf
 232 KB 0364127899 - Figures from Registry Packet.pdf

In the folder

 Info from EPA

No need to print the entire 2011 report from EPA but you may want to print the figures / tables or otherwise have available as well as all the figures and tables in the 2013 file folder which also has correspondence that presents the tribes concerns regarding the closed case 0364127899 TOWER STANDARD SERVICE.

 2013 - Additional Info from EPA
 3,408 KB 2011 - LDF Fireworks Site Final Phase II ESA.pdf
 1 KB Fireworks Stand Report.txt

If I find other data for discussion I will place in the main folder by tomorrow morning early.

Questions?
